

University of New Haven

Office of the President

To Whom it May Concern,

I am writing to offer my enthusiastic recommendation for Nipson KC.

I have come to know Nipson, a 2025 graduate of University's master's program in information science, through his work spearheading the first-ever Hult Prize program to be held at the University of New Haven.

His efforts as campus director of the Hult Prize, leading an initiative that is described as the "Nobel Prize for Students," exemplified his passion for and commitment to making a difference.

In many ways, the Hult Prize and Nipson's dedication to fostering social impact truly embody the University's vision to be a private university with a public mission. Thanks to his leadership, the University of New Haven's program was recognized among the Top 5 in North America and ranked in the Top 35 globally, recognized among more than 3,000 universities across 120 countries.

Through the success of the University of New Haven's inaugural participation in the Hult Prize, Nipson has created a foundation for this transformational program to reach even greater heights in the future.

An individual of unlimited promise, Nipson exemplifies an infectious can-do spirit. He is intelligent and motivated, and his future is incredibly bright. I see no ceiling on what he can accomplish.

Above all, Nipson has shown himself to be a wonderful ambassador for the University, and I have great confidence he will bring great value to your organization.

All my best,

A handwritten signature in black ink, appearing to read "J. Frederiksen".

Jens Frederiksen, Ph.D.
President
